

# — Millenium

L'intera struttura è in alluminio, la tensione del telo è garantita da un sistema motorizzato che agisce su una speciale molla posizionata all'interno del terminale e tramite un sistema di carrucole e cavi agganciati direttamente al rullo avvolgitore.

**Tutta la viteria e bulloneria è in acciaio inox o in acciaio con trattamento GEOMET® 321.**

The whole structure is in aluminium, the fabric tension is guaranteed from a motorized system that operates onto a special spring which is inside the terminal bar and also from a system of pulleys and cables that are anchored directly to the roller tube.

**All the screws and the bolts are in stainless steel with GEOMET® 321 treatment.**

Toute la structure est en aluminium. La tension de la toile est garantie par un système motorisé qui agit sur un ressort spécial qui est inséré à l'intérieur de la barre terminal et, à travers un système de chariots et câbles accrochés directement au tube.

**Toutes les vis sont en acier inox ou en acier traité GEOMET® 321.**
